

### RAISING AWARENESS

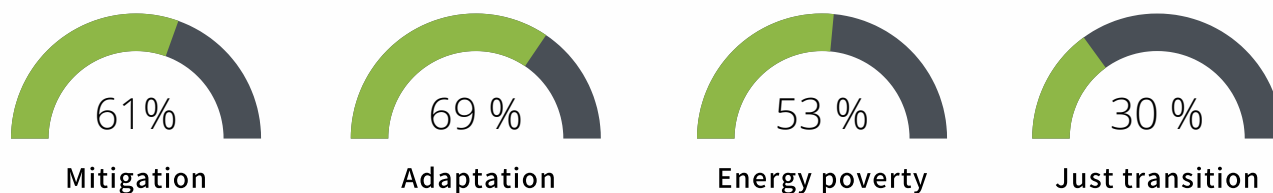

#### How are Supporters promoting the Covenant?

#### How are Supporters participating in Covenant activities?

#### Which topics need more awareness-raising in your territory?

#### Good practices

**Romania**

ABMEE has promoted the CoM, its related commitments and the SECAP to the Ministry of Energy, to the Energy Efficiency Department as well as to the new team installed in the Municipality of Brasov following the elections.

**France**

ALDA organised the session "Covenant of Mayors: The Sustainable Energy and Climate Action Plan in Metropolitan Areas" as part of the Nature of Cities Festival. The workshop tackled the strategic relevance of the CoM and the important role of metropolitan areas in the adoption of the SECAP.

**Hungary**

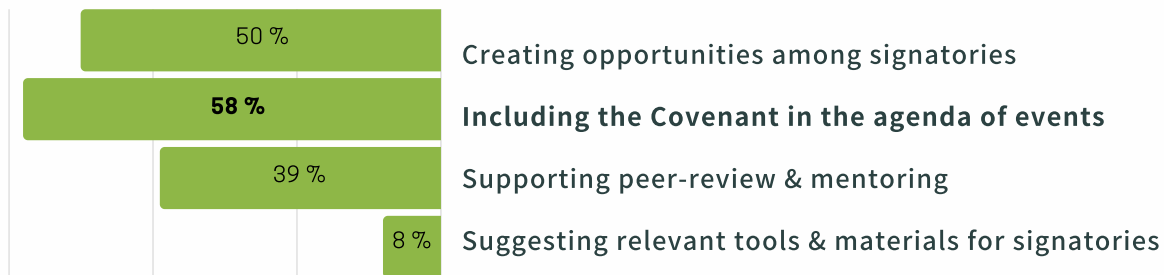

In Hungary, Energiaklub presented the importance, main aims and structure of SECAPs/climate strategies to representatives of local public authorities.

## Type of support on capacity building

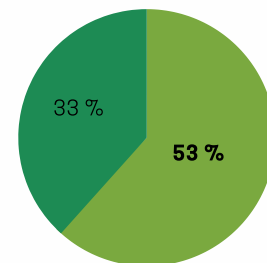

## Type of support on knowledge sharing

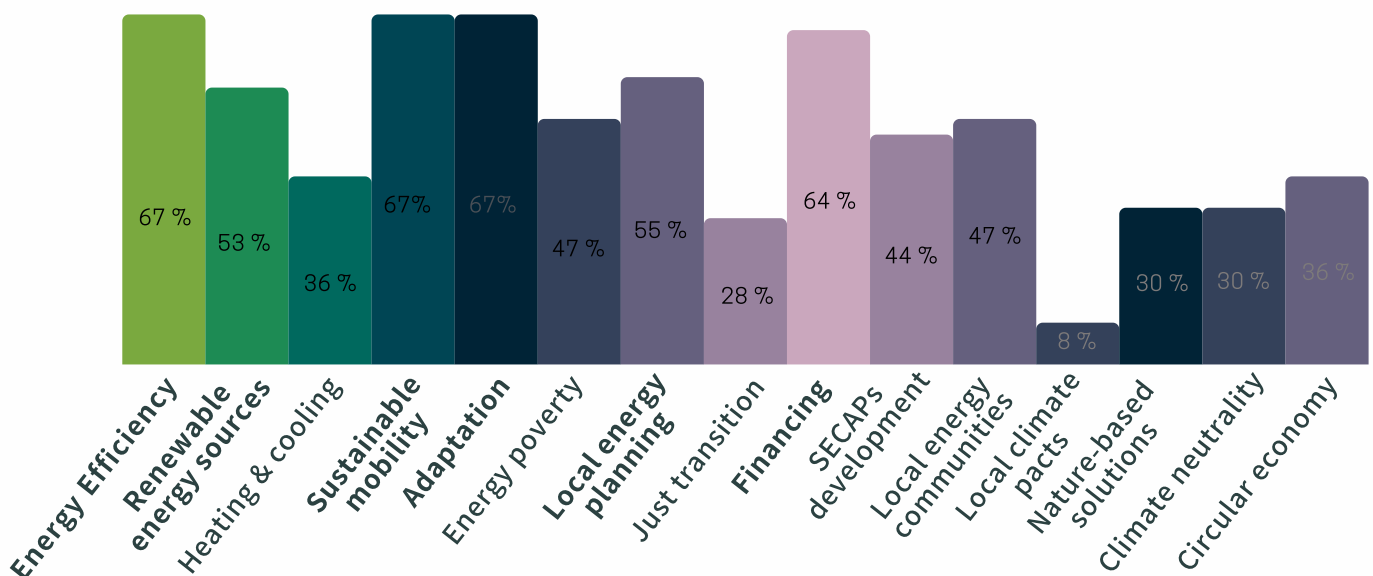

## Knowledge of funding available at the regional or national level to finance CoM-related actions

Yes ■  
No ■

## Topics of interest for capacity building

 **Good practices** 

**Portugal**

Each year, **AdEPorto - Agência de Energia do Porto** publishes an Energy and Emissions report which make it possible to monitor the evolution of energy use in the territory of Signatories, as well as the resulting emissions.

**Bulgaria**

**Sofia Energy Agency - SOFENA** has organised training sessions for municipalities and state authorities where CoM was promoted.

**Belgium**

**Eurocities** regularly organises brokerage events for its members to present funding and financing opportunities, highlighting their relevance to fund cities' SECAP actions.

**Italy**

**AICCRES** has a specific section in the website for exchange of Best Practice on climate adaptation. Besides, AICCRES has linked the CoM to the 2030 Agenda SDGs: at their global event (Venice City Solutions 2030), they disseminated best examples of Local authorities dealing with the SDG related to the Planet.

**Hungary**

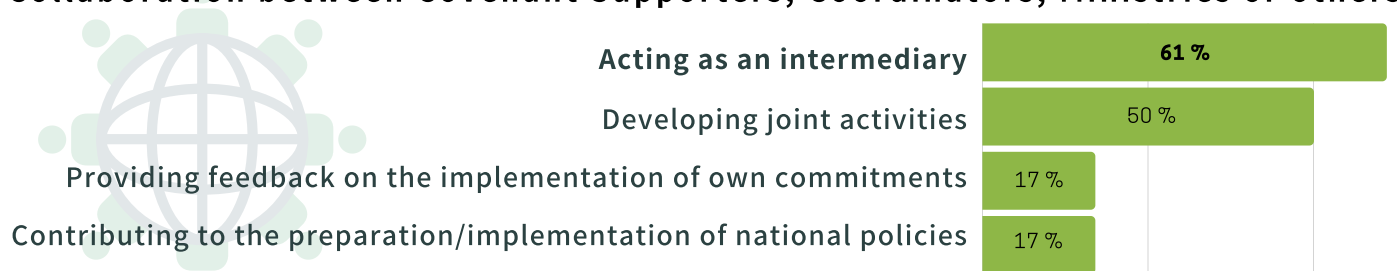

**Energiaklub** developed a peer-to-peer learning program among forerunner and committed cities in the frame of Multiply project (funded by H2020 Programme) with the aim to develop district-level energy plans based on the CoM goals and methods.

**Belgium**

**Parc Naturel de Gaume** created a team with the Signatories manager of the Covenant and policy-makers, who meet once a month to discuss a subject. They also created an online platform to exchange on good practices, informations and ask for help.

## MULTI-LEVEL GOVERNANCE AND STAKEHOLDER ENGAGEMENT

### Collaboration between Covenant Supporters, Coordinators, Ministries or others

 **Good practices** 

**Slovak Republic**

Within the framework of EUCF, ZZMO CITENERGO, in collaboration with ENVIROS, s.r.o., the Union of Slovak Cities and the Buildings for the Future platform, organised webinars on city investment plans and funding opportunities.

**Belgium**

**UVCW** works with Walloon Region (Regional Coordinator of the CoM) in the context of the "POLLEC" Programme to support the municipalities in their actions taken to achieve the commitments of CoM.

**Italy**

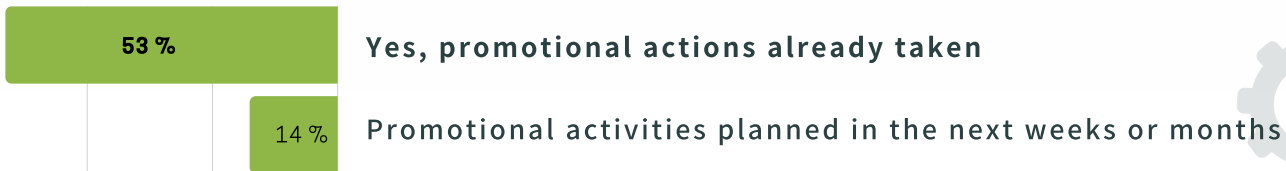

**AGIRE** participated in a LIFE project called DIADEME with a small company, Revetec Srl, engaged in research of innovative solutions for smart street lighting to reduce energy consumption and gas emissions.

TARGET OF 55 %  
2030

CLIMATE NEUTRALITY  
2050

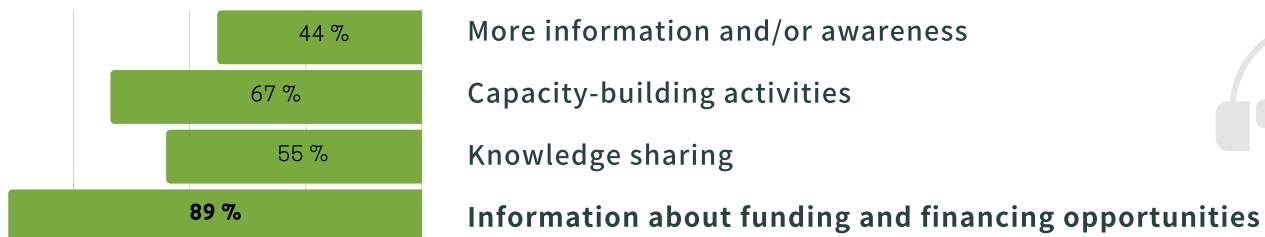

## Actions taken and foreseen to promote the renewed CoM - Europe ambitions

## Perception of the renewed ambitions and targets by local authorities

## Support needed by the Signatories to achieve the renewed targets

## THIS REPORT IN FIGURES

- This report is based on responses from **36 CoM Supporters**
- **16 countries** are represented in this Implementation Report
- The respondents represent **5100 local and regional governments**
- The results of this report result from a Survey sent to all Covenant Supporters between June and July 2021
